

Project: Comments on project documentation Portal Implementation

Vodárenská akciová společnost, a. s.

Vodárenská akciová společnost, a. s. supplies drinking water and takes care of the drainage and treatment of wastewater in the Vysočina and South Moravian Regions in 727 municipalities for more than half a million people. The water supply network of Vodárenská akciová společnost, a. s. comprises a 5,100 kilometres long water supply network, a 3,000 kilometres long sewerage network, 165 wastewater treatment plants and 83 drinking water treatment plants.

The aim of the project for Vodárenská akciová společnost, a. s. [hereinafter referred to as “VAS”] is to expand the existing VAS portal for commenting (gisp.vodarenska.cz/eportal) to include a new public agenda entitled “Comments on project documentation” for one of the six divisions of VAS (the Boskovice Division).

The main benefit of the project is the introduction of a single communication portal channel for the purpose of transmitting project documentation to VAS and elimination of various other channels of communication with the public (such as email, letter, etc.). As a result of the implementation of the “Comments on project documentation” portal, the required

input information for applications from applicants and the templates for comments from VAS have been unified. The solution also enabled faster processing and delivery of the relevant comments on project documentation to the respective applicants. The deployed solution brought significant time savings for VAS staff and communication with the public was made more efficient thanks to the expansion of the digital communication channel – the VAS Portal.

Further phases will probably follow the project of implementing the “Comments on project documentation” portal. The agenda will be extended to all VAS divisions (the remaining five) and will be integrated with the surrounding information systems.

The project for Vodárenská akciová společnost, a. s. ran from September 2022 to the end of January 2023, when it was released to the public – users and put into production. The cooperation between Asseco Central Europe, a. s. and Vodárenská akciová společnost, a. s. on the portal for commenting has been ongoing since 2012, when the portal was put into production and its operation and technical development was arranged.
